Education

Frederick University

2020 – 2024

Bachelor's Degree of Computer Science (BCS)

Limassol, Cyprus

I studied computer science at Frederick University, where I gained a Bachelor's Degree of Computer Science (BCS) in 2024. During my studies, I focused on developing software applications and web development projects.

Skills

Languages: JavaScript, TypeScript, Python, HTML, CSS, SQL

Frameworks: React JS, Next JS, Node JS, Express JS, TailwindCSS

Software Skills: Git, GitHub, Figma, AWS (S3)

Projects

Harmony

Jan 2024 - Present

[View Project](#) [GitHub Repo](#)

Developed a SaaS document management platform with collaboration features and AI assistance. Includes real-time editing, commenting, and AI-powered text completion, summarization, and translation. Offers tiered subscriptions for various team sizes.

Technologies: Next.js, Typescript, Convex, TailwindCSS, Stripe, Shadcn UI, Clerk

ProfitScan

June 2023 - Present

Developed ProfitScan, a financial analysis tool that allocates expenses to transactions, generates detailed P&L accounts, and provides customizable reports. Helps businesses identify profitable segments and enhance overall financial performance. (Private repository)

Technologies: Streamlit, Python, Pandas, Numpy, Matplotlib

Employment

Full Stack Developer

June 2023 – July 2024

PANALINE - Remote

- I created a tool for businesses to manage and examine the financial data to find where and how their expenses are allocated through a dynamic, interactive dashboard.
- Users can apply expense allocation rules to examine their profit based on those rules.

Activities & Interests

- Currently learning Three.js to enhance my 3D graphics skills in web development.
